

# **Importance Of Sports Institute In Sports Development - Indonesia Model**

**Dr Junaidi**

*Faculty of Sport Science-Jakarta State University*

In Indonesia, the sport is regulated by state law called the law of the National Sports System. National sports system management is the responsibility of the Minister. The government determines national policy, national sports standards, as well as the coordination and supervision of the management of national sports

In the legislation National Sports System, the scope of the sport includes: a). physical education, that sport events are organized as part of the educational process. b). recreational sports, that sport undertaken as part of the process of restoration of fitness and health. c). sports competitions, that sport as an effort to improve the capabilities and potential athletes in order to enhance the dignity of the nation.

In Indonesia, the institution that handles sport science carried out by the three institutions, namely : 1). Center for Development of Science and Health National Sports under the Ministry of Youth and Sports is more focused on scientific development. 2). Sports science center under Indonesian national sports committee and focused on the application of sports science for the benefit of the athletes. 3). Indonesian private sector, Medco company E & P Indonesia has built Sport science center for the implementation of the 26th SEA Games in Palembang in 2011.

In fact, although the development of Sport science is done by three institutions above, but the human resources come from the Faculty of Sport Science. Personnel in sports that comes from sport science faculty consists of coaches, teachers, referees, judges, managers, promoters, administrators, instructors, biomechanics experts, psychologists, medical personnel and other personnel associated with sports activities, who should have the qualifications and certificates of competency issued by the organization of the sport and/or government authorities.
